

TENSION BUSHINGS

Metal Bushing Italia supplies DIN 1498 tension bushes manufactured from high-strength 50CrV4 steel. These bushings offer excellent vibration damping and impact resistance for secure connections in demanding environments.

Technical Specifications:

- *Material:* 50CrV4 Steel
- *Standard:* DIN 1498 (defines dimensions and tolerances)
- *Applications:* Reduced vibration and noise in oscillating or slow-rotating movements, shaft location and fixation.
- *Slot Types:* DIN 1498 specifies a straight slot (EB-A) as the standard, but other slot variations like arrow-shaped (EB-B) and wavy (EB-C) may be used depending on the application.
